

Food Solutions – Sip by sip

Create the next Food Venture

JOIN THE FOOD SOLUTIONS PROGRAMME IN 2025!

Challenge 2025:

Redefine „Ready to Drink” and create a minimally processed drink with natural ingredients, highlighting health, sustainability, and eco-friendly packaging. Develop a unique concept, product description, design, and market strategy that showcase innovation and nutritional value.

Who can apply?

Students currently enrolled in one of the participating Universities with a passion for food, innovation and entrepreneurship. Bachelor, master and PhD students can join.

The duration of the programme:

March to November 2025, with a few hours of your time occasionally.

The goal of the Food Solutions:

The goal of Food Solution programme is to raise awareness on global food challenges and promotes entrepreneurship as a possible career path.

Why is Food Solutions useful?

You and your team of 3-5 people will participate in a competition where teams from different European universities compete to develop sustainable solutions for the food industry. At the end of the programme, you will participate in a final conference abroad, where the top 3 teams will also be awarded. In addition, they can apply for further development grants offered by the EIT Food and for the market introduction of their idea.

FOOD SOLUTIONS PROGRAMMES BRING INDUSTRY, SCIENTISTS AND STUDENTS TOGETHER TO SOLVE GLOBAL FOOD CHALLENGES.

WHAT TO EXPECT?

- ✓ Further build your professional skills
- ✓ Develop your entrepreneurial mindset
- ✓ Work with food industry professionals and experts
- ✓ Chance to win financial prizes
- ✓ Benefit from and gain specialist food industry knowledge
- ✓ Access technical facilities and visit industry sites
- ✓ Receive mentoring from industry and academic experts
- ✓ Opportunity to pitch to the food industry

During the programme

- ... you will have to participate in online meetings a few times a week
- ... develop international contacts during meetings
- ... you have to present your progress during the programme period
- ... we finance the materials needed to make the prototype

DEFINE YOUR OWN PROBLEM, SOLVE IT, AND PLAN YOUR OWN START-UP!
